## APPENDIX

The following tables summarize the revenue data that were used in the analysis, including company counts, facility counts, average number of facilities per company, and revenue statistics by SIC code and employee or SBA size standard. Tables A-1 through A-3 provide the results for coal- and oil-fired utilities in SIC code 4911, RCRA Subtitle C hazardous waste facilities in SIC code 4953, and solvent recyclers in SIC code 7389. Tables A-4 through A-7 provide results for the remaining SIC codes in the analysis. Tables A-4 and A-5 group companies by number of employees, first based on primary SIC code (Method A) and then based on any SIC (Method B) code. Tables A-6 and A-7 sort companies by SBA size standard, again by primary SIC code and then by any SIC code.

The data in Tables A-4 through A-7 were calculated using the methodology described in Section 1.2.4. Establishments with missing or inconsistent data in Dun's were handled as follows. First, a small percentage of ultimate parents did not have revenue data. The number of ultimate parents from which the revenue data was calculated is indicated in the sales count column of the tables. Second, a small number of the establishments with 10 or more employees had ultimate parents with fewer than 10 employees, apparently as a result of Dun's database errors. The tables include an unknown employee category for such companies. Also included in the unknown employee category are ultimate parents for which the number of total employees were missing. Finally, a few establishments had an ultimate parent ID number for which there was no match. According to Dun's, this occurs when a facility provides information and the corporation does not. These companies are also included in the unknown employee category for the tables grouped by number of employees; in the SBA size standard tables, these companies are listed as "No co. found".
